The PARI-MUTUEL-ENGINE is an online betting tool where the bettors can place bets with coins see their betting status and even withdraw their revenues into their wallets. It's a whole process carrying fun in bets and money making quick. The engine keeps on being updated as per the new events happening in the world like the coming world cup. This document highlights the benefits in using the PARI-MUTUEL-ENGINE and the guidelines on how to use it.

III- Benefits in using the PARI-MUTUEL-ENGINE.

Dear reader, if you are looking for a way to make more money instantly and grow your purse, then you are actually knocking at the right door by reading this. Starting with 10 coins, turning into 15, 20, 30, ... 100 coins. Then withdrawing it into your wallet. Finally your wallet that had 10010 coins is now having 10100 coins in just a few moment. How amazing, the way we can make money quick with the PME.... The PARI-MUTUEL-ENGINE gives the assurance to grow the bettors purse easily as they can just place bets, see their status, decide to withdraw and safely as the security can never be compromised.

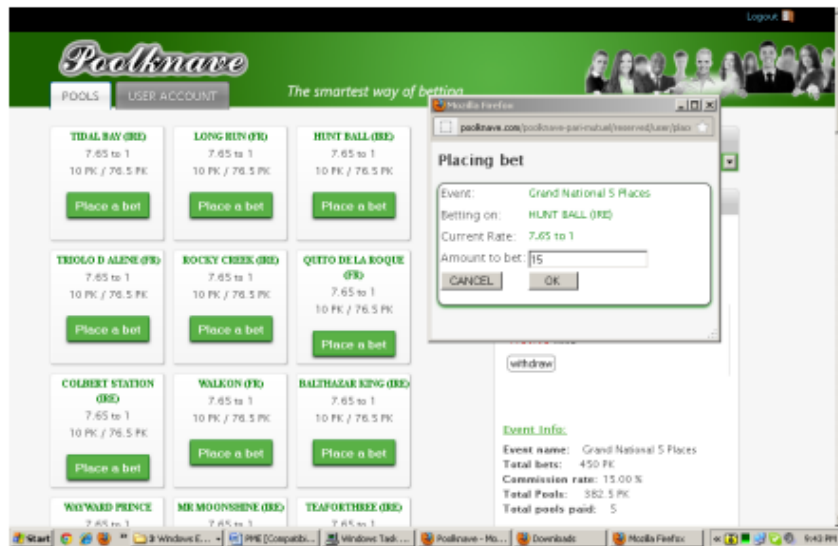

IV- Using Guidelines.

1- User's guidelines.

a- Registration.

Like any safe application, the user needs to register in the database before accessing with its user name and password. The user's identifications are encrypted even the developers of can't see what is the user's password, this information remains only knowledgeable to the owner.

b- Placing bets.

Picture 1

As it is being illustrated by the picture, the bettor chooses the POOL that he would like to bet on by clicking on the PLACE BET button from the concerned POOL, a window dialog will then be open allowing him to place the amount he wants as long as it is lesser or equal to his account balance.

c- User account.

The screenshot shows the 'USER ACCOUNT' page on the Poolnave website. The page has a green header with the Poolnave logo and the tagline 'The smartest way of betting...'. Below the header, there are two main sections: 'Win market' and 'Place market', each with a table of betting events. A 'User update' form is also present on the right side of the page.

Win market

Event	Pool bet on	Money bet	Winning pool	Winning PK
Grand National Winner	HUNT BALL (IRE)	10.00		
Grand National Winner	ROCKY CREEK (IRE)	12.00		

Place market

Event	Pool bet on	Money bet	Winning pool	Winning PK
Grand National 6 Places	ROCKY CREEK (IRE)	30.00	ROCKY CREEK (IRE), BALTHAZAR KING (IRE), DOUBLE SEVEN (IRE), CHANCE DU ROY (FR), PINEAU DE RE (FR), ALVARADO (IRE)	54.19
Grand National 5 Places	HUNT BALL (IRE)	15.00	ROCKY CREEK (IRE), BALTHAZAR KING (IRE), DOUBLE SEVEN (IRE), PINEAU DE RE (FR), ALVARADO (IRE)	0

d- Password change

The screenshot shows a web application interface. At the top right, there is a 'Logout' button. Below it is a green banner with a group of people. A 'User update' dialog box is open, containing three password input fields labeled 'Old password:', 'New password:', and 'Retype password:'. Each field contains a series of dots. Below the fields are two buttons: 'Reset' and 'Change'. In the background, a table is visible with the following data:

Winning PK
HAZAR KING (IRE), 54.19

Picture 3

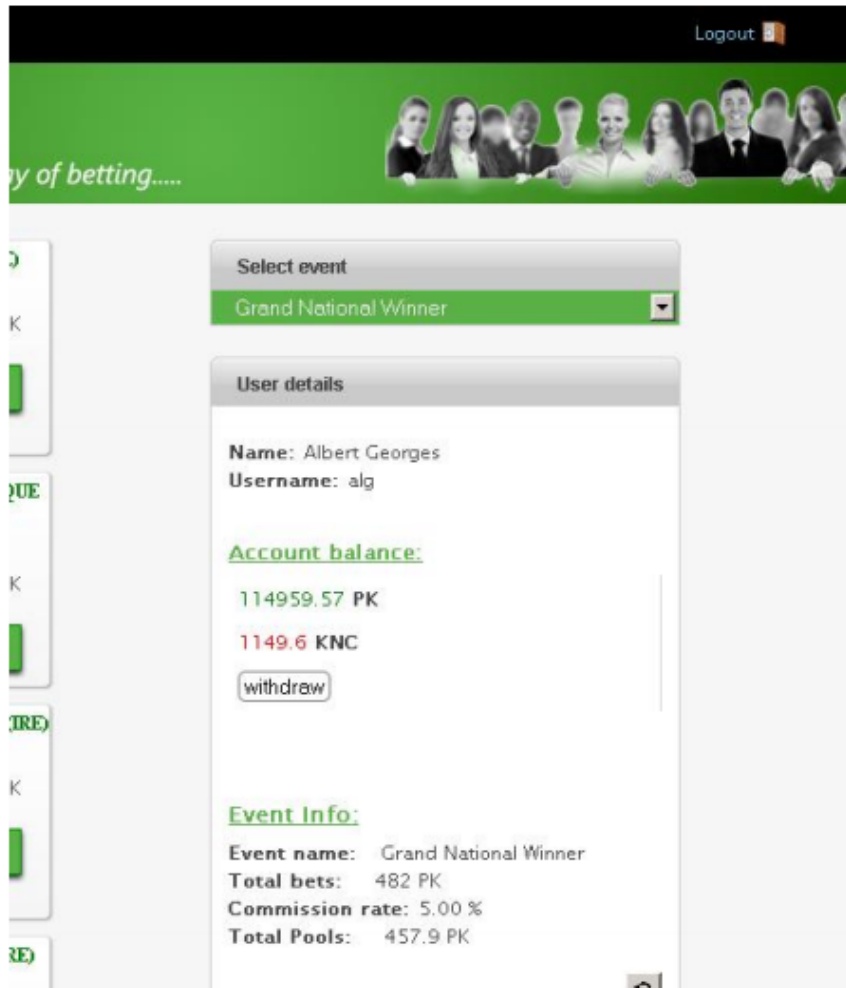

In order to change his password, the user is required to enter his current password and the new one he would like to replace the current with twice. Then follows a hit on the button "Change" to apply the change, if he ever feels wrong in the typing he may then reset the form by hitting on "Reset" that will undo all text typed. Note that, no one but the user has the ability to change the password. Even the admin cannot.

Note that, no one but the user has the ability to change the password. Even the admin cannot.

e- Coins withdrawal

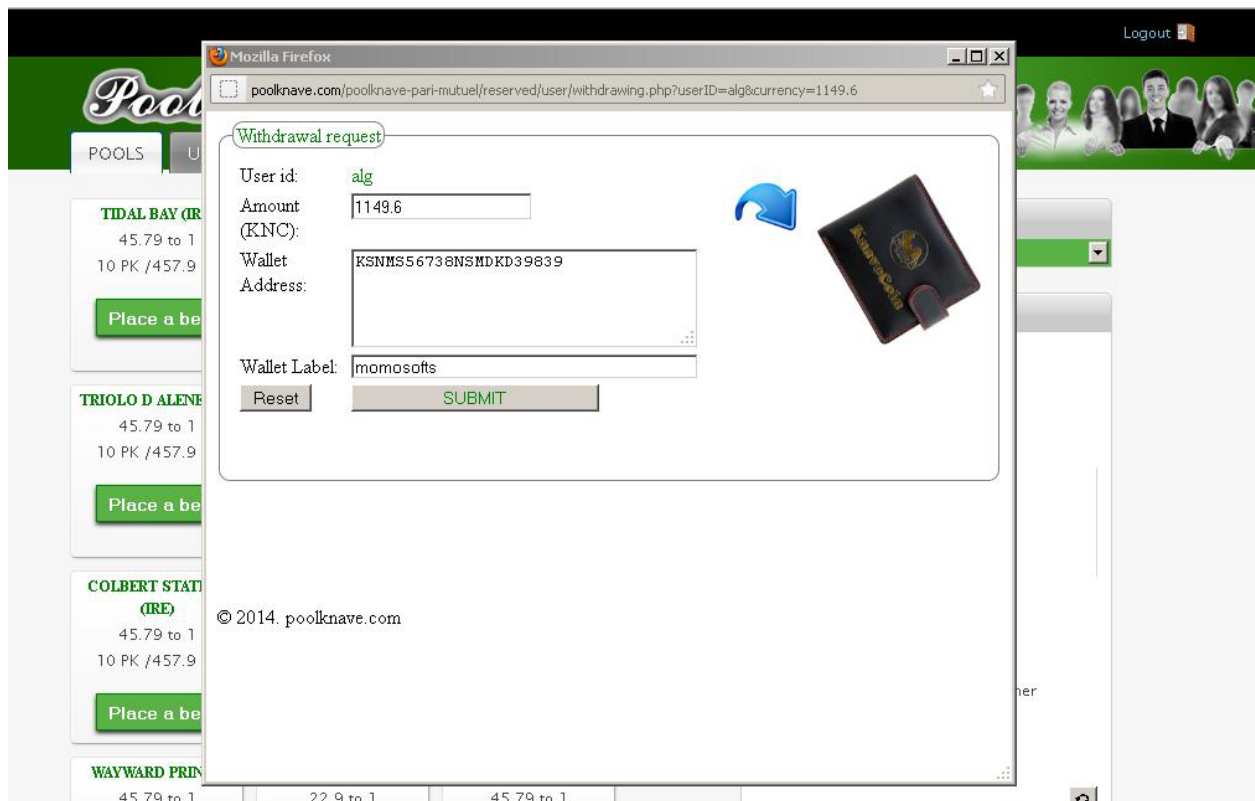

picture 4

Just follow the what is in picture 4 to request a withdrawal of your KnaveCoins. This will be done via email as a special security method That's why Knavecoins are converted in

Pooltokens and it has to be verified. You will need a Knavecoin wallet to receive your Knavecoins.

As we can see in the picture 4, the account balance in PK (PoolKnave coins) and in KNC (Knave coins), 1KNC = 100 PK. The user can hit the button “withdraw” to withdraw he wishes to. Once done, a window dialog opens containing the withdrawal form wherein the user can enter the amount as long as it is not greater than his balance, then enters his KNC wallet address and label. Once all set he can then press on “SUBMIT”.

The request will be sent to the admin who will do the coins transfer to the concerned user’s account.

Picture 5 shows what happens when you make the request for your coins.
